RE: EarthFirst PLA Films

Dear Mr. Bower:

This is to confirm that EarthFirst PLA Films (with a maximum thickness of 20 mils for cast or tented films and 4.75 mils for blown films) are authorized to carry the BPI Compostable Logo (shown on the right). EarthFirst PLA Films meet all of the requirements of ASTM D6400. They will disintegrate and biodegrade swiftly and safely in a professionally managed composting facility and not leave behind any plastic residues.

Should there be any additional questions feel free to contact me directly by phone or email:
